RE: TMDL resubmit comments and bacti calcs

Chris,

No, not from my end. In my best professional judgment, “replace” = “withdraw and resubmit”, which is what we’ve already vetoed.

My 5/2 e-mail (attached) to you had my follow-up questions around ‘replace’ that I don’t think you responded to. If you think replace means something different, please let me know as soon as possible.

In our phone call, I said that that if EPA wanted to us to withdraw or replace (or any other synonym), Christine would need to talk directly to Heather about that, because the Dan-Heather agreement was no withdraw.

In your earlier 5/2 e-mail, you stated “We will schedule a meeting with Christine soon to discuss any remaining questions or alternatives.” Did that happen?

I’m not doing anything on my end because I thought this was in your court. If I’m not tracking, let’s chat on the phone. I’m around today until 5:00 or a touch later and tomorrow 2-3 or 4-5.

Hi Andrew,

I am on the road most of this week so unfortunately I will not be able to attend. We are making progress - any movement on the replace language so that we can move forward? □□

Chris

Chris,

Good morning. Are you planning to attend tomorrow's Deschutes Advisory Group meeting? If so, a heads up that we've been asked to explain what is going on with the Deschutes TMDL approval, so if you attend folks will likely direct questions to you.

On a related front, any progress on the letter from your end?

Andrew
